Pawan Rajput

Applying for Robotics Annotator Intern | B.Tech CSE (AI/ML), Batch 2026-27

+918010927311 rajputpawan9765@gmail.com pawanrajput8010 Pawan8010 Sangli, India

WORK EXPERIENCES

Software Developer Intern Jul 2025 - Aug 2025

CODEXINTERN

- Shipped **3 production features** with unit/integration tests across **8,000**+ lines of reviewed, OWASP-compliant code; ran PR reviews and daily Agile standups.
- Profiled a live service and added an async Redis cache, **cutting API response time 77%** (**420 ms → 95 ms**).

Technologies / Skills Used : *Redis, OWASP*

Technical Head Aug 2024 - Present

Matrix Mind Club

- Lead a **15-member team** building AI-powered internal tools and real-time dashboards for **500**+ concurrent users; run code reviews to keep quality standards consistent.

EDUCATIONS

Rajarambapu Institute of Technology | Sangli 2023 - 2027

B.Tech *CGPA : 7.56 / 10*

PROJECTS

LivestockAI – AI Cattle Breed Identifier Jan 2026 - Present

Developer

- An image-classification microservice that identifies a cattle breed from a photo and estimates crossbreed composition, built so field users get an instant result on their phone.
- Trained and evaluated a MobileNetV2 model in TensorFlow against labeled breed images, then served it through a FastAPI microservice with Firebase for auth and data.
- **94.2%** classification accuracy; used by **200**+ daily users.

: TensorFlow, MobileNetV2, FastAPI, Firebase

OpsBrain AI – Hybrid RAG Knowledge Platform | Pawan8010 Jan 2026 - Present

Developer

- An enterprise question-answering platform for industrial documents where every answer is traceable to its source, with a citation and audit trail so humans can verify and review outputs.
- Ingested **6 file formats** (PDF, DOCX, PPTX, XLSX, CSV, HTML) into section-aware chunks; combined keyword, vector (Qdrant) and graph (Neo4j) retrieval with reranking; used Gemini for answers; ran **4 services** in Docker Compose.
- **100%** pass rate on a **25-question** benchmark; **30 automated tests** with GitHub Actions CI gating every merge.

: Docker, Qdrant, Neo4j, Gemini

GoldenHour – AI Emergency Triage Tool | Pawan8010 Jan 2026 - Present

Developer

- Built in **24 hours**; scores a structured **56-field** patient assessment through a REST API split into **3 modules** (ML scoring, classification, voice API). Result: a working end-to-end triage prototype.

Developer Jan 2026 - Present

: STM32 Microcontroller

SKILLS

Frameworks & Libraries :	TensorFlow, MobileNetV2, FastAPI, Node.js, Express, React.js
Programming Languages :	Python, Java, JavaScript, TypeScript, SQL
Soft Skills :	DSA, OOD, SOLID, OS, DBMS, Computer Networks, Testing
Tools & Platforms :	PostgreSQL, MongoDB, Redis, Docker, Git, GitHub, GitHub Actions

AWARDS & ACHIEVEMENTS

- **Winner**, ET GenAI Hackathon 2026
- **Finalist**, Frontend Battle 2.0, IIT Bhubaneswar (500+ participants)
- **TCS CodeVita Season 13**: Global Rank **2,754** of **300,000**+ participants (top **1%**)
- **GSoC 2025** contributor; **GirlScript Summer of Code** top **5%** contributor and mentor.

CERTIFICATIONS

- **Oracle Database SQL Certified Associate**
- **Cisco IoT (NASSCOM) Certified**
- **Google SWE Fundamentals**
